Temporary power you can depend on

The work force has trusted the Arrow Hart and Cam-Lok solutions to deliver power when safety is essential and timely job completion is mandatory. Eaton's Temp Power product offerings will keep you productive during the most extreme conditions.

Challenges

Limited receptacles

Multiple workers on a construction job site and everyone's running a power tool

Arrow Hart solutions

RhinoBox series

RhinoBox utilizes up to seven 20A weather resistant duplex receptacles to allow workers to plug in power tools, equipment, radios and lights

Challenges

Wet environment protection

Need to protect equipment and workers from ground faults however there is no GFCI around and the environment is wet or rainy

Arrow Hart solutions

Watertight GFCI

Portable GFCI with watertight plug and connectors provides NEMA 4X protection from harsh environments while offering automatic or manual GFCI protection

Challenges

Multiple rooms on-site

Need to string power to various rooms on a construction job site

Arrow Hart solutions

Multiple rooms on-site

RhinoBox and portable outlet boxes can be utilized together to spread power from one central location to each space

Challenges

Fast assembly and disassembly

Temporary power requirements to an entertainment venue that needs to be set up and disassembled quickly and repeatedly

Cam-Lok™ solutions

J-series connector

Cam-Lok™ J-series connectors provide the ability to quickly connect and disconnect power without the use of tools

Challenges

Power needed fast

Temporary power for disaster relief after the storm

Cam-Lok™ solutions

Posi-Lok™ series connectors

The interlocked Posi-Lok™ power distribution system requires the user to connect and disconnect in sequence therefore providing a safe connection solution

Temporary power solutions

Get the power you need on the job

RhinoBox heavy duty and E-series temporary power centers are designed to deliver safe and reliable temporary power in industrial and commercial job site conditions

RhinoBox features & benefits

"Plug & power" temporary power centers provide reliable power for construction sites, renovations, demolition, sporting events, entertainment venues, filmmaking, carnivals and more. Plug into the power of RhinoBox for all your temporary power needs.

Tool less and hinged clear polycarbonate door over circuit breaker panel provides damp location protection

Complete wiring diagram on inside cover providing simplified identification

NEMA Type 3R protection for the most rugged environments

Sturdy heavy duty steel legs are reinforced to withstand abuse and provide long lasting performance

Unique interlocking legs ensure secure stacking for storage and transport

Powder coated enclosures are weather resistant and high visibility OSHA safety red

Clearly marked safety and testing instructions are easy to read

Flip covers provide maximum weather resistance

Ground fault circuit interrupters (GFCIs) protect against ground faults

3/8" holes in legs ideal for caster, sled legs and attachment to fixed surfaces

Weather resistant "WR" duplex receptacles provide more options for multi-use applications in outdoor environments

Available for locking and straight blade applications, devices have ratings that are clearly marked for easy identification

See page 6 for E-Series temporary power centers

RhinoBox heavy duty temporary power centers with GFCI protection

Product description

50A input
20A, 30A, 50A output
120/240 V/AC (max.)

RB302M

Features

- Safely centralize and distribute temporary power on the job site
- Unique patented “stackable” design allows multiple RhinoBox units to lock together for safe transport and storage
- NEMA Type 3R rainproof enclosures
- Available with manual or automatic GFCI reset configurations
- Each 125V receptacle is protected by a dedicated GFCI unit and breaker
- Steel flip door over breakers with clear window to easily see breaker handles
- Each circuit has dedicated breaker for short circuit overload protection
- Flip-up circuit breaker cover prevent accidental tripping

Product description

50A input
20A, 30A, 50A output
120/240 V/AC (max.)

RB300ME

Features

- Safely centralize and distribute temporary power on the job site
- Unique patented “stackable” design allows multiple RhinoBox units to lock together for safe transport and storage
- NEMA Type 3R enclosures designed with two devices per circuit
- Available with manual or automatic GFCI reset configurations
- Every two 125V receptacles is protected by a shared GFCI unit and breaker
- Solid steel flip door over breakers give access to breaker handle
- Weatherproof receptacle covers protect from damage and weather
- Flip-up circuit breaker cover prevent accidental tripping

Portable outlet box

Built to withstand, deliver and perform

Arrow Hart's portable outlet boxes offer a safe, durable and efficient temporary power solution

Portable outlet box features & benefits

Rough and tough industrial grade portable outlet boxes are the bridge you need on location to provide safe power to industrial plants, building maintenance, food & beverage facilities, construction sites, shipyards, entertainment venues, filmmaking sets and expositions.

Related products

A wide range of wiring devices are available in many amperages that complement the portable outlet box line – straight blade receptacles, locking receptacles, plugs and more. These devices are offered in watertight, weather protective, isolated ground and corrosion resistant styles.

Product description

Standard depth box, extra depth box, feed through box, portable outlet box cover plates

Features

- Innovative one-piece design incorporates integrated strain relief and cover plate mounting holes (standard depth only)
- Rugged Alcryn® and Valox® materials provide durability in industrial applications
- Variety of standard and flip lid cover plates available for customized installations
- Non-conductive Alcryn® material provides protection against electric shock
- Large internal volume for ease of wiring

Industrial grade portable GFCIs

Portable protection from electrical injury

Arrow Hart's portable GFCIs give you the assurance that comes from knowing you are protected from ground fault hazards while on the job site

Portable GFCI features & benefits

Portable GFCIs offer exceptional protection against electrical shock when connected to power generators, agricultural equipment, portable electric heaters, submersible pumps, industrial washers, outdoor signs and vending equipment.

Available in a variety of cord lengths, with terminated devices or flying leads for field terminations

Related products

A full line of locking plugs and connectors, watertight devices, plus straight blade plugs & connectors provide many configuration options.

*Automatic reset GFCIs also available. When ordering automatic portable GFCIs replace "M" in Catalog number with "A".
Example: GFI11A155 = Automatic; GFI11M155 = Manual.

Material characteristics: Polycarbonate body. Temperature rating: -35°C to 66°C (-31°F to 151°F).

Compliances, specifications and availability are subject to change without notice.

RoHS compliant

Cam-Lok™ J-series applications, features & benefits

Discover how Cam-Lok™ J-series connectivity outperforms hardwiring

Cam-Lok™ J-series connectors quickly replace traditional hardwiring and offer more safety with integrated watertight insulators and a strain relief system. Plus, a wide range of sizes, colors and accessories are available for complete flexibility

Cam-Lok™ J-series features & benefits

Non-metallic retaining screw provides safe, strong and reliable contact retention

Easy assembly with standard tools

Retaining screw snaps into place to prevent loss

E-Z align drive pin increases torque and longitudinal strength 300%

Accommodates a wide range of cable sizes: #2 – 4/0

Double set screw termination for added strength (crimp also available)

Non-vulcanized E1016 & EZ1016 plugs feature a high-strength, molded-in-place locking ring to capture and secure the insulator to the contact

Wide range of colors available

Single pole connectors

Cam-Lok™ J-series E-Z1016 plugs

Product description

Cable size #2 AWG – 2/0
600V AC/DC, up to 300A continuous
NEMA 3R

E-Z1016-8354

E-Z1016-8380

J-series E-Z1016, elastomeric, non-vulcanized, double set screw connection

Features

- E-Z assembly and disassembly-no tools needed
- Double cam principle provides a positive, vibration-proof connection
- Self-compensating for wear
- No moving contact surfaces, eliminating arcing or burning
- Superior electromechanical connections
- Locked contacts will withstand a pulling force of 1,000 lbs.
- 1/3 of a turn assures a high pressure contact approaching 600 lbs. per sq. in. providing minimum resistance
- Contacts carefully machined from a high conductivity brass to a smooth sliding fit and easy locking action
- Watertight elastomeric insulators molded from color-fast material, color-coded for easy phase identification
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety
- Integrated strain relief system features a retaining wire that prevents cable jacket pull-away and bare conductor exposure
- Plugs feature a high-strength, molded-in-place locking ring to capture and secure the insulator to the contact
- Accepts a wide range of cable sizes

Posi-Lok™ applications, features & benefits

Quick and safe power distribution connection system

Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) Standards, the built-in safety features require the user to connect or disconnect each plug in sequence. Protective receptacle covers cannot be raised until the preceding plug is locked into position

Applications

- Posi-Lok™ power distribution panels bring a new level of safety to electrical power applications
- Posi-Lok™ systems utilize single conductor cable that can be used to full amperage capability without the need to derate like multi-conductor solutions
- Posi-Lok™ products are ideal for disaster relief, temporary power, standby emergency power and power distribution applications

Specifications

Electrical ratings

- 600 Volts
- 200 Amps continuous (E0200)
- 400 Amps continuous (E0400)

Temperature ratings

- -40° C to 105° C

Materials

- Cable sizes: #2-4/0
- Insulator: Elastomeric
- Contact: Copper

Environmental

- NEMA 3

Certifications

- UL Listed: E67181
- CSA certified: LR13963-48

Posi-Lok™ features & benefits

Safe, sequential interlock ensures ground mates first and breaks last

Limit switch capabilities

Reliable Posi-Lok™, cross-phase protection system ensures phase integrity

Quick and easy installation - panels can be mounted into a standard 19-inch rack

UL Listed and CSA certified

Lockout-tagout compatible for safety and security

Shatter-resistant insulators and polarizing shells provide long-lasting, durable connectors

Double set screw termination for added strength and quick installation (crimp also available)

Plugs are uniquely keyed and color-coded to eliminate cross-phasing

Single pole connectors

Posi-Lok™ E0200 series panels and plugs

Product description

Cable size #2 AWG-2/0

600V AC/DC, up to 200A continuous

Posi-Lok™ E0200 series female panels and male plugs

Features

- Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) Standards
- Sequential interlock system requires the user to connect and disconnect each plug in sequence
- Polarized plugs and panels eliminate the possibility of cross-phasing
- Built-in strain relief reduces cable strain
- Proven Cam-Lok™ double cam principle provides a positive, vibration-proof connection
- No moving contact surfaces, eliminating arching or burning of contacts
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety

Female panel part numbers

Add "LS" suffix to end of part number to order panels with a limit switch.

Available on all positions. Consult factory.

Limit switch ratings are [125, 250, 480V/AC, 15A], [125V/DC, .5A], [250V/DC, .25A]

Plugs must be ordered separately. See page 24.

*Panels with 4 receptacles will have 2 blank plates to match the same footprint as 5 receptacle panels

**Panels with 3 receptacles will have 2 blank plates to match the same footprint as 5 receptacle panels

Color information:

BK (Black), RD (Red), GR (Green), WH (White), BU (Blue), BRN (Brown), ORG (Orange), YEL (Yellow)

BK	RD	GR	WH	BU	BRN	ORG	YEL
(Black)	(Red)	(Green)	(White)	(Blue)	(Brown)	(Orange)	(Yellow)

Testing & code compliance: Listed to UL498, file no. E67181, CSA certified to C22.2, no. 182.3-M1987, file no. LR13963

Material characteristics: Panel: Steel, Temperature rating: -40° C to 105° C

Compliances, specifications and availability are subject to change without notice.

Single pole connectors

Posi-Lok™ E0400 series plugs

Product description

Cable size #2 AWG - 4/0
600V AC/DC, up to 400A continuous

Posi-Lok™ E0400 series male plugs, crimp & double set screw

Features

- Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) Standards
- Polarized plugs eliminate the possibility of cross-phasing
- Proven Cam-Lok™ double cam principle provides a positive, vibration-proof connection
- No moving contact surfaces, eliminating arching or burning of contacts
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety
- Built-in strain relief reduces cable strain

Posi-Lok™ E0400 series panels

Product description

Cable size #2 AWG - 4/0
600V AC/DC, up to 400A continuous

Posi-Lok™ E0400 series male panels

Features

- Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) Standards
- Sequential interlock system requires the user to connect and disconnect each plug in sequence
- Polarized panels eliminate the possibility of cross-phasing
- Proven Cam-Lok™ double cam principle provides a positive, vibration-proof connection
- No moving contact surfaces, eliminating arching or burning of contacts
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety

We make what matters work.*

* At Eaton, we believe that power is a fundamental part of just about everything people do. Technology, transportation, energy and infrastructure—these are things the world relies on every day. That's why Eaton is dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because that's what really matters. And we're here to make sure it works.
