Marine Beetle Box

This portable, Marine Beetle Box, is an ideal power distribution center built for maximum functionality. The Marine Beetle Box is constructed of a rugged, non-metallic rubber, with GFCI circuit protection. This allows for a stronger, safer, and more portable way to distribute power at your marina, dock, or yacht.

- Marine Rated
- Branch circuit protection
- Convenient carrying handle
- Lightweight, Durable, and Compact
- Impervious to rust due to its non-metallic frame
- Ground fault circuit interrupters (GFCI) protection
- Elevated base keeps receptacles above ground level
- Breakers mounted under hinged window for easy access
- Spring loaded covers protect receptacles from dirt and moisture
- Non-metallic rubber housing to insulate against electrical currents
- Sturdy construction that stands up to the toughest marine environments

(1) 50A 125/250V twist lock marine rated receptacle
(1) 30A 125V twist lock marine rated receptacle
(2) 20A GFCI 125V straight blade receptacles
Other configurations are available. Please contact us for pricing.
